2. The following is an examiner's statement of reasons for allowance: the claims are allowable over the prior art of record because the prior art fails to show or suggest, either singly or in combination pair of front and rear support rods having a pair of lateral portions formed on top thereof. The front support rods including a pair of opposing guide trenches on the respective lateral portions. The rear support rods including a pair of outwardly-folded upper ends and opposing through holes on the respective lateral portions. The front underside of a seat comprises a pair of engaging elements wherein each engaging element has two lateral portions, a slide rod connecting the two lateral portions and an upper portion. The rear underside of the seat comprises a pair of fitting elements wherein each fitting element has two lateral portions, opposed fitting holes and an upper portion. The seat is secured to the support rods by passing pins through the fitting holes and through holes and also by passing the slide rods into the guide trenches.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
